

Rahmtullah Hussain

Data Analyst

New Delhi, India | rahmatullahhussain577@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

BCA graduate with internship experience at GeeksforGeeks and 4 end-to-end analytical projects across e-commerce (Myntra), food delivery (Swiggy), entertainment (IMDB), and healthcare (Hospital Wait List). Proficient in SQL for data querying, Python (Pandas, NumPy, Matplotlib, Seaborn) for analysis and visualisation, and Power BI & Excel for interactive dashboards. Driven by a strong interest in uncovering patterns that support smarter business decisions.

WORK EXPERIENCE

Data Analyst Intern

GeeksforGeeks | Feb 2026 – Apr 2026 | Noida, India

- Performed exploratory data analysis on structured datasets to uncover trends and business patterns.
- Wrote SQL queries for data extraction, filtering, and aggregation from structured databases.
- Designed visualisations and summary reports to communicate findings to non-technical stakeholders.
- Assisted in building summary reports and data stories to support editorial and content decisions.

PROJECTS

Myntra Sales Analysis | Excel & Power BI

- Cleaned and processed Myntra sales dataset using Excel; built a multi-page Power BI dashboard.
- Identified top-performing products, categories, and seasonal revenue trends.
- Delivered actionable insights on sales performance to support inventory and marketing decisions.

Swiggy Revenue & Category Analysis | SQL

- Used SQL joins, aggregations, and subqueries to analyse order data, revenue, and delivery performance.
- Identified top revenue-generating restaurants and best-selling food categories.
- Analysed peak order hours and customer ordering patterns to highlight growth opportunities.

IMDB Movies Analysis | Python (Pandas, NumPy, Matplotlib, Seaborn)

- Performed end-to-end EDA on IMDB dataset covering ratings, genres, directors, and box office revenue.
- Cleaned and transformed data using Pandas; built visualisations with Matplotlib and Seaborn.
- Identified top-rated genres, high-grossing directors, and rating distribution trends.

Hospital Patient Wait List Analysis | Power BI

- Analysed inpatient and outpatient patient wait list data (Jan 2018 – Dec 2020) covering 678K+ records.
- Built a 2-page interactive Power BI dashboard with KPI cards, donut chart, and time-series line chart.
- Compared average and median wait times across medical specialties and patient age groups.
- Enabled Average vs Median toggle for flexible analysis across Outpatient, Day Case, and Inpatient types.

TECHNICAL SKILLS

Languages

Python, SQL

Python Libraries

Pandas, NumPy, Matplotlib, Seaborn

BI & Analytics

Power BI, Microsoft Excel (Advanced)

Concepts

EDA, Data Cleaning, Data Visualisation, Dashboard Design, Data Storytelling

Tools

GitHub, VS Code, MySQL Workbench

EDUCATION

Bachelor of Computer Applications (BCA) | CGPA: 7.34/10

IKG Punjab Technical University (IKGPTU) | 2020 – 2023

CERTIFICATIONS

- Data Analytics with AI — GeeksforGeeks
